11. _____ All of the following statements concerning the thoracoacromial artery are correct **EXCEPT**:
- It arises from the second part of the axillary artery.
 - It pierces the costocoracoid membrane of the clavipectoral fascia.
 - It divides into four branches deep to the clavicular head of the pectoralis major.
 - It arises beneath the upper border of the pectoralis minor.
 - It arises at the lower border of the subscapularis muscle.
12. _____ Which of the following is **NOT** true of a lesion of the radial nerve?
- It may be caused by a fracture of the midshaft of the humerus.
 - It may be caused by a dislocation of the head of the humerus.
 - It may be caused by a deep laceration of the anteromedial surface of the arm overlying the medial epicondyle of the humerus.
 - It may cause paralysis of the extensor digitorum communis muscle.
 - It may cause anesthesia on the dorsal surface of the proximal phalanx of the second digit.
13. _____ In a typical innervation pattern of the hand, which of the following muscles is supplied by branches of the median nerve?
- abductor pollicis brevis
 - abductor pollicis longus
 - adductor pollicis
 - palmaris brevis
 - second and third interossei
14. _____ A penetrating wound to the axilla that severs the posterior cord of the brachial plexus would denervate which of the following muscles?
- serratus anterior
 - pronator teres
 - deltoid
 - biceps brachii
 - infraspinatus
15. _____ All of the following muscles attach to the radius **EXCEPT** the:
- biceps.
 - supinator.
 - brachioradialis.
 - brachialis.
 - pronator quadratus.

Netball Questions

TOTAL 25 MARKS

Answer ALL questions on answer sheet provided
DO NOT WRITE ON QUESTION SHEET

True or False.

- Players allowed in the goal circle must be good at rebounding after missed shots at goal
- A player is not allowed to pass the ball with a one handed throw
- It is an advantage for a Goal Keeper to be tall, quick and agile.
- A lob pass can be used to get the ball under or around a tall defender
- When a player goes out of their designated area then the player will be sent off for 2 minutes

Multiple Choice

- How is the time in a Netball game divided?
 - Quarters
 - Halves
 - Thirds
 - It isn't divided at all, you play the whole game with no breaks
- How many players on court, in one team?
 - 4
 - 5
 - 6
 - 7
- If the ball goes out of court, what happens?
 - The umpire throws it in
 - The opposite team throw it in
 - Nothing happens, the ball is played on
 - The teams talk to each other and decide who will take the pass
- How close can a defender stand to someone who has the ball?
 - As close as they like
 - 1m – 3 feet
 - 2m – 6 feet
 - 3m – 9 feet

10. How many people on your team can shoot?

- 1
- 2
- 3
- Anyone on court can shoot

11. When can you kick the ball in netball?

- To pass it to someone
- If you drop it and need to keep it away from a defender
- You can't kick the ball at all
- To take it out of someone's hands

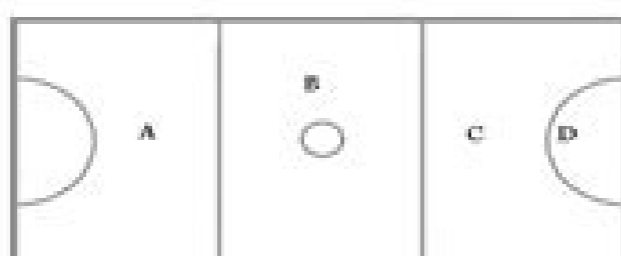

12. Which of these is not a form of contact?

- Pushing another player
- Tripping over another player
- Hitting the ball out of a players hand
- Standing in front of a player that is trying to shoot

13. How long can you hold the ball for in Netball

- You have to pass it straight away
- 3 seconds
- 4 seconds
- As long as you want

14. If Player A threw the ball 'Over a Third', who could they be throwing it to?

- Player B
- Player C
- Player D
- Player C and Player D

15. Which of these is NOT a position on a Netball court?

- GA
- WA
- WK
- GK

16. What does GS stand for?

- Goal Shooter
- Goal Scorer
- Great Shooter
- Good Scorer

Teacher's Guide Immigration

Dear Educator,

Experience the hardships and appreciate the courage of the millions of immigrants who have entered the U.S. since 1820! With **KIDS DISCOVER Immigration**, your young historians will learn about the fascinating topics at right.

This Teacher's Guide is filled with activity ideas and blackline masters to help your students enjoy and learn more from *Immigration*. Select or adapt the activities that suit your students' needs best.

Thank you for making **KIDS DISCOVER** a part of your classroom.

Sincerely,
KIDS DISCOVER

P.S. We would love to hear from you! E-mail your comments and ideas to teachers@kidsdiscover.com

Meeting the Standards

✓ United States History: Era 6 The Development of the Industrial United States (1870-1900)
- *National Standards for History*

✓ Visit www.kidsdiscover.com/standards to find out more about how **KIDS DISCOVER** meets state and national standards.

PAGES	WHAT'S IN IMMIGRATION
2-3	Immigrants All! How long have humans been migrating? What challenges do immigrants face?
4-5	A Nation of Immigrants Why do immigrants come to America, where do they come from, and where do they settle?
6-7	The Immigrant Experience What life was like for newly arrived immigrants
8-9	A New Wave The changing faces of America's immigrants
10-11	Waves of Immigrants Graphs of immigration patterns starting in 1820
12-13	Immigrants in Their Own Words A chart of seven young recent immigrants and their thoughts on their new homeland
14-15	It's the Law Immigration restrictions, illegal aliens, and how to become a U.S. citizen
16-17	Around the World International migration
18-19	Student Activities Make three international desserts, plus a crossword, matching, and resources

Answer the following questions using the map and legend on this page.

1. What city is located along Interstate 71? _____
2. Is Lower Lake Road north or south of Lake Springs Road? _____
3. What is the population of Third Fork? _____
4. In which direction does Interstate 71 run? _____
5. What local road you would take to get from Friendly Corner to Third Fork? _____
6. What is the population of Junction City? _____
7. Is the lake north or south of Friendly Corner? _____
8. What road would you travel on to get from Quiet Valley to the airport? _____
9. Is the lake east or west of the mountains? _____
10. In which direction would you travel to get from the airport to the mountains? _____
11. Is Third Fork east or west of the campgrounds? _____
12. Which interstate takes you from Junction City to Friendly Corner? _____

All the answers to these start with a zero in the pounds, but don't forget to put in the decimal point!

1. $17 \overline{) £1.87}$ 2. $30 \overline{) £6.30}$ 3. $23 \overline{) £7.13}$ 4. $9 \overline{) £3.33}$

5. $17 \overline{) £3.40}$ 6. $40 \overline{) £11.60}$ 7. $13 \overline{) £1.69}$ 8. $18 \overline{) £2.52}$

9. $28 \overline{) £10.64}$ 10. $32 \overline{) £7.04}$ 11. $19 \overline{) £7.22}$ 12. $14 \overline{) £2.10}$

Working out:

Social distancing measures include instructions to work from home, plexiglass barriers, or six-foot markers in public spaces. Contact Tracing: The process of public health officials identifying individuals who have been infected with or exposed to a viral illness in order to further mitigate and manage the virus's spread within a community. Flattening the Curve: The curve here refers to the shape on graphs like number of cases or hospitalizations. Droplets containing a virus can be expelled when an infected person talks, breathes, sneezes, or coughs. Photo Courtesy: Oli Scarff/AFP/Getty Images. R0: A number indicating the average number of people that will catch a disease or illness from one infected person. Because this particular virus was novel to humans, there was no existing immunity or ability to fight off the virus's effects. COVID-19: the name of the disease that SARS-COV-2 can cause. N95: Also called a respirator, this special type of mask covers the nose and mouth and is manufactured to safely filter particles that can cause COVID-19 when fit-tested and used correctly. Remdesivir works by preventing replication of RNA within viral particles so that the virus cannot multiply and spread within the body as easily. Evidence suggests that individuals who are asymptomatic can still transmit the virus to others. Quarantine/Self-Quarantine: A quarantine is a period of isolation following exposure or potential exposure to a virus, in order to prevent passing the virus to others. Individuals who have been potentially exposed to COVID-19 are advised to quarantine for at least 10 days following the exposure. R0 is used as a measure of how contagious a disease is. The virus can still be spread during this time period. According to the Center for Disease Control and Prevention (CDC), zoonotic diseases are relatively common. 6 out of 10 of all known diseases are zoonotic. Vaccines are preventive measures that can increase immunity on a large scale. Community Transmission: these are cases of infection which cannot be directly linked to an individual's known journey or to a previously identified positive case. Dexamethasone is recommended as a treatment for moderate to severe COVID-19 to work against lung tissue damage. These masks are typically reserved for healthcare professionals or those who come into close contact with active infections and are not recommended for use in public. Airborne diseases tend to be more contagious than those requiring physical contact. Aerosol: A small particle of respiratory fluid that contains viral material and can remain in the air for a period of time. Photo Courtesy: stuart/Getty Images. Remdesivir (Veklury): A FDA-approved antiviral drug for the treatment of COVID-19. Examples of PPE include facial screens, masks, glasses, clothes and gloves. Isolation differs from quarantine in that quarantine occurs after potential exposure to a disease, and isolation occurs after an individual has been infected. Isolation/Self-isolation: When an individual has a confirmed or suspected case of a disease or virus, he should isolate himself. Dexamethasone: A corticosteroid with anti-inflammatory and immunosuppressive effects, often used to fight respiratory diseases. COVID-19 is an abbreviated version of the "2019 coronavirus disease". Photo courtesy of Gary Hershorn/Getty Images. Zoonotic: A description of a disease that can spread from animals to humans. The R0 for COVID-19 transmission in the United States varies from region to region.
